# CHAPTER 10

Developing an Evaluation Process

# Objectives

Understand why evaluation is important

# Objectives

- Understand why evaluation is important
- Understand methods for evaluation

# Objectives

- Understand why evaluation is important
- Understand methods for evaluation
- Select an evaluation method or methods for your watershed

# Why is an evaluation important?

- Tells you whether or not your efforts are successful
- Provides a feedback loop for improvement

• Changes in knowledge or awareness

- Changes in knowledge or awareness
  - Changes in attitudes or behavior

- Changes in knowledge or awareness
- Changes in attitudes or behavior
- Which BMPs were adopted or not

- Changes in knowledge or awareness
- Changes in attitudes or behavior
- Which BMPs were adopted or not
- Changes in condition of the watershed

- Changes in knowledge or awareness
- Changes in attitudes or behavior
- Which BMPs were adopted or not
- Changes in condition of the watershed
- Improvements in water quality

# Select an evaluation method that is right for your watershed

- For each objective or task ask: "How can I measure effectiveness?"
- Select an evaluation method that performs the desired measurement.

#### Method

Surveys

#### Measures

 Attitudes, beliefs,
\$\$, easy, longbehaviors

#### Pros/Cons

term (3-5 yrs.)

#### Method

#### Measures

#### Pros/Cons

Surveys

- Attitudes, beliefs, behaviors
- Focus Group Perceptions, opinions

- \$\$, easy, longterm (3-5 yrs.)
- \$\$, fast

Method

Measures

Pros/Cons

Surveys

 Attitudes, beliefs,
\$\$, easy, longbehaviors

term (3-5 yrs.)

Focus Group • Perceptions, opinions

• \$\$, fast

Interviews • Attitudes, beliefs • takes time

#### Method

#### Measures

#### Pros/Cons

Surveys

- Attitudes, beliefs, behaviors
  - \$\$, easy, longterm (3-5 yrs.)

- Focus Group Perceptions, opinions

• \$\$, fast

- Interviews
- Attitudes, beliefs takes time

- Photographs Before & after conditions
- \$\$, easy to implement

Method Pros/Cons Measures Attitudes, beliefs, • \$\$, easy, long-Surveys term (3-5 yrs.) behaviors • \$\$, fast Focus Group • Perceptions, opinions Interviews Attitudes, beliefs • takes time Photographs
Before & after • \$\$, easy to conditions implement Physical outcomes • \$\$, easy to Calculations/ implement models

Method Pros/Cons Measures Attitudes, beliefs, Surveys • \$\$, easy, longterm (3-5 yrs.) behaviors • \$\$, fast Focus Group • Perceptions, opinions Interviews Attitudes, beliefs • takes time PhotographsBefore & after • \$\$, easy to conditions implement Physical outcomes • \$\$, easy to Calculations/ implement models \$\$\$, long-term Monitoring **Environmental** impacts (7-10 years)

# When do you conduct the evaluation?

- During implementation to provide feedback
- After project activities to measure project effectiveness

As a minimum, include a mid-course or annual evaluation so that you can modify the plan to assure that goals are achieved.

# Plan for the evaluation

- Collect baseline information if you will make comparisons
- Make arrangements to collect data effectively

# Who should conduct the evaluation?

- Steering committee
- Outside assistance for complicated methods

## Product

• A description of the process that will be used to evaluate the effectiveness of implementing the plan and achieving its goals.
